Avaya IP Phone J159

Give Your Power Users an IP Phone that has a small form factor packed with numerous feature buttons

The Avaya J159 IP Phone is targeted to users who desire a small form factor on their desk, packed with feature buttons and meets the everyday voice communications needs of its users. It is a competitively priced, high-performing IP Phone and features primary and secondary color displays, four feature keys on the main screen plus 6 feature keys on the integrated expansion module, 4 softkeys, high quality HD voice, integrated Gigabit Ethernet interface and headset support. The J159 IP Phone leverages your enterprise IP network to deliver sophisticated voice communications from headquarters, remote locations, or home offices. Tightly integrated with Avaya Cloud Office, Avaya Aura®, and Avaya IP Office™ platforms, the J159 IP Phone optimizes communications through a flexible architecture that leverages existing investments and accommodates changing business needs.

Key Features and Benefits

- Supports 2 Feature keys as line keys and 2 Feature additional Feature keys on the main screen.
- Delivers high definition audio that can increase productivity by reducing fatigue and provides easier-to-understand multi-party calls through the wideband audio codec in the headset and handsfree.
- Simplifies call control on the display using four context sensitive softkeys for everyday functions such as New Call, End Call, and Redial.
- Additional hardkeys provide quick access to often used functions such as transfer, conference, hold/resume, contacts voicemail and recents history.

The Avaya IP Phone J159 is a multiline phone ideally suited for power users who consider the phone to be one of many useful communication tools and who rely on common functions like directory and speed dial to enhance productivity and collaboration.

- EHS capable headset interface.
- Improves and makes efficient network installation through support of a secondary Gigabit Ethernet port for a PC.
- The handset has built in volume boost for hearing impaired to avoid having to purchase a separate amplified headset.
- Accommodates advanced unified communications solutions through Session Initiation Protocol (SIP).
- Supports reduced energy consumption and lower costs through Power-over-Ethernet Class 1 design with “sleep mode”.
