

GMD1208

Desktop Wireless Microphone

About the GMD1208

GMD1208 is an extension microphone companion device for Grandstream audio and video conference products such as GAC25x0 and GVC32x0 series to increase the overall audio coverage range. With ultrasound pairing, long talk time, proprietary 2.4G/BLE dual mode and error-resilient long-distance transmission, GMD1208 brings mobility and flexibility to your powerful conference solutions with ease. Each GMD1208 unit supports 360-degree full band quality voice pickup, within a radius of 26 feet (8 meters) for the best user experience.

Product Positioning

GMD1208 features a multi-functional touch key works just like your Bluetooth headphone, a LED indicator for status notifications, a well-designed wired/wireless charging base, all these user-friendly features make GMD1208 an ideal choice for organizations that need optimal microphone placements with ultra-wide room coverage and crystal-clear audio quality.

GMD1208 Key Technical Specifications

MIC	8 omni-directional MEMS
Maximum Connection Distance	Up to 26 ft. pickup range, In 2.4G mode: up to 66 ft., In Bluetooth mode: up to 33 ft.
Audio Feature	ANS, AGC/DRC, Anti-howling, Noise shield
Audio Codecs	Opus
Bluetooth	Bluetooth 2.1+EDR Rate: 1 Mb/s for BR, 3Mb/s for EDR.
Mode Switch	Proprietary 2.4GHz, Bluetooth
Cascade Ability	Up to 2

Competitive Features

- Capacitive touch mute button with LED
- 1500mA built-in Li-Ion battery
- Micro-B port for charging, BYOD microphone and upgrading
- Low power indicator
- Bluetooth v2.1+EDR protocols
- Proprietary 2.4GHz wireless technology
- Ultrasound pairing technology
- High-quality audio coding with error tolerance
- Built-in 8 omni-directional MEMS with 26ft. pickup range
