

Jabra GN

Jabra Evolve 80

Engineered to be the best headset for concentration in the open office*

Unrivalled Noise Cancellation

Built to eliminate noise, Jabra's unique Active Noise Cancellation (ANC) filters out low-frequency background noise. Unique designed ear cushions block high-frequency sounds so you can enjoy your music or phone calls without distraction. Noise-cancelling microphone makes sure that you and the other party can hear each other loud and clear.

Simple plug-and-play setup

Works straight out of the box with all leading UC systems. Installation is as easy as simply plugging it into the USB-A or USB-C port or 3.5mm jack to your laptop, or by using the 3.5mm jack straight into your mobile device.

Intuitive control unit

Get easy access at your fingertips to the most used functions, like answer calls, volume up/down, and mute microphone.

Signal your availability

Whether you are on a call or working on a task needing your full attention, the Jabra Evolve 80 has an integrated busy light on the ear cups, letting people around you clearly see your availability. You can activate the red busy light to create your own concentration zone and keep you from being disturbed whenever required. Jabra Evolve 80 makes a great travelling companion too in noisy airports and public environments for phone calls or for music and relaxation. You can take your concentration zone wherever you need to go.

- **All-day comfort**
Leather-feel ear cushions, and around-the-ear design for all-day use
- **Works with all leading UC platforms**
Certified for Skype for Business, Cisco, and more

How to connect

Connect to PC/laptop

Fully plug the headset into the controller, and connect the controller to a USB-A or USC-C port.

Connect to mobile device (without controller).

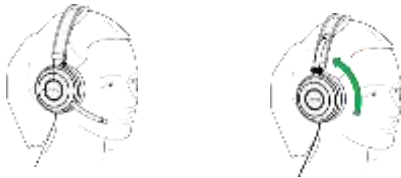

Plug the 3.5mm jack directly into your mobile device.

How to use

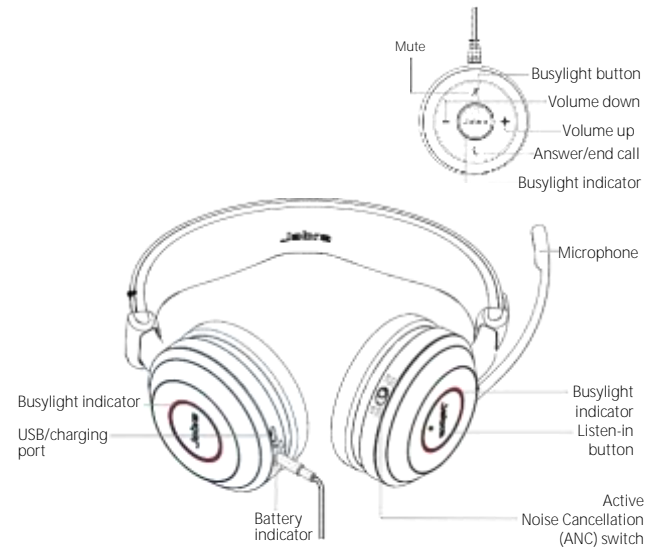

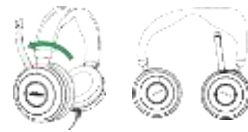

It is recommended to position the microphone close to your mouth (2 cm). The microphone is bendable for personal preference.

When listening to music or when outdoors, the microphone can be stored in the headband groove.

Fold-flat storage

The earcups can be folded-flat for easy storage. The microphone must be removed from the headband groove and swiveled backwards before folding the earcups flat.
